### Hair Transplant

Esthetica hospital strives to be the hospital that sets a respectable example for the medical industry in all aspects, from medical care quality to accessibility, from service to safety. Esthetica is the hospital that goes one step further beyond others. We have never been and do not intend to be a hospital that follows. On the contrary, we are the hospital that takes the leadership in order to suggest new directions for an industry in terms of standards. Our ongoing mission is to relieve and comfort anyone seeking medical aesthetic care, by providing the best achievable life quality for every patient. Esthetica is talent oriented and dedicated in its pursuit of excellence.

The promise we make to our patients stands strong and shall not be broken.

Our First Class Doctors, Surgeons and Medical Professionals, Total of 15 luxury post-operative rooms, Physical Therapy and Rehabilitation Services, Aesthetic and plastic surgery centre, Fully equipped dental clinic, Physical medicine and rehabilitation units specially designed for hair transplantation, Preferred location in terms of transport, airport transfers and travel programs, Dedicated international department for our guests from all over the world. They can serve patients in Arabic, German, English, French, Dutch, Turkish, Russian and Azerbaijani, Most of our doctors and surgeons are members of the association of Turkish Plastic Reconstructive and Aesthetic Surgery and/or the Society of Aesthetic Plastic Surgery, The foundation of our health care group by Dr. Murat Akdogan dates to 2007. Since then we came to be one of the top Aesthetic Clinics in the world. Our expert staff is well trained for care and treatment in medical centres, Coming to esthetica our patients and guests have an opportunity to use our well qualified SPA and Wellness centre.

FUE method is the last and most commonly used technique used since 2004. When compared to the old method, it is reveals to be more comfortable as operation for both patient and doctor. Due to the fact that it is a technique, open to the technological developments, in every passing

day, it has been utilizing the benefits of technology. Due to used micromotor and edges technique, operation duration is extremely short, when compared to FUT. As no cut is required, the possibility of the patient to feel himself/herself comfortable during the operation is higher. FUE does not leave scars, differently from the FUT technique. In FUE, the baldness of 85% of the patients is covered with a single session. For only 15% of all patients' groups a second session may show necessary. In FUE, the operation duration is shorter (5 hours on average). There is no need for extra time for the grafts' separation. In FUE technique, taken roots are cleaned from the remains; therefore it is possible to open smaller canals for the transplantation. By this means, there is no scar left in the transplantation field. The patient is discharged without any bandage on his/her head. FUE method, preferred by physicians at earlier stages, is shown to be more trustworthy being more widespread among the doctors nowadays.
